

## SIGNAL SUCCESS WON BY ALLIES IN BIG ADVANCE AT DARDANELLES

Four Lines of Trenches On Gallipoli Taken By British In Charges That Carries Them Over Half Mile Towards Goal

LOSSES ON BOTH SIDES  
REPORTED TO BE GREAT

Krithia Captured and New Zealand and Australian Riflemen Now Hold Heights Commanding Kilit Bahr Forts and Narrows

(Associated Press by Federal Wireless.)  
LONDON, July 1.—Signal success, although won at a heavy cost, is reported in the official despatches from the Gallipoli Peninsula, where the Allied forces have been driving against the Turkish trenches along the Krithia line across the peninsula.

Last night's official bulletin in Paris announced that on Sunday, June 27, the British captured four successive lines of trenches and in a series of brilliant charges advanced up the peninsula a little more than a mile—to be exact, fifteen hundred meters.

Strong Positions Taken  
Until the last two advances of the French and British, the Turks continued to maintain their hold upon the village of Krithia. This is no longer the case, while the heights commanding the land approaches to the Kilit Bahr forts and the Narrows are now held in impregnable force by the New Zealand and Australian riflemen. The Turks have been stoutly resisting the steady advance of the Allies, holding their trenches until the last and suffering great losses.

British Losses Heavy  
One trench, recently captured, held the dead bodies of six thousand Turks, while corresponding casualties have been inflicted in other sections of the front. The British losses have also been very heavy in the advances across the heights in the face of the entrenched enemy.

Predictions made by the French are that the Turkish losses have been so heavy and their defeats so constant that the defense of the peninsula is about to collapse.

Constantinople official despatches continue to claim victories for the Turks.

NO SUDDEN COLLAPSE  
(Associated Press by Federal Wireless.)  
CONSTANTINOPLE, July 1.—After an inspection of the Turkish positions on the peninsula of Gallipoli, the correspondent of The Associated Press is able to affirm that no sudden collapse of the Ottoman defense and no speedy forcing of the straits by the Allies is possible.

The Allies are making progress, but they have a long, hard, costly fight ahead of them, and they must bring up many a shipload of reinforcements before they can meet the enemy on even terms.

At present, all the Turkish positions are well manned. In fact, the defending army outnumbers its assailants two to one. German officers are leading the Turks.

SUBMARINE REFLOATED:  
DAMAGE NOT YET KNOWN

(Associated Press by Federal Wireless.)  
SAN FRANCISCO, July 1.—The submarine H-3, which went ashore at Point Sur on Tuesday afternoon, while en route from San Diego to San Francisco, was successfully refloated last night and is proceeding here under its own power. The little vessel is not leaking, but whether the hull was damaged or not is unknown. Probably she will be sent into drydock at the Mare Island Navy Yard. During the afternoon, the tender Cheyenne stood by, waiting for high tide, when, as expected, the underwater craft was able to work herself free.

## Russians Make Stubborn Stand Before Warsaw

Should Austro-Germans Break Through Pines Coyeted Polish Stronghold Would Fall

(Associated Press by Federal Wireless.)  
LONDON, July 1.—Continuous fighting prevails along the greater part of the Galician front, with the Russians holding their lines along the Bug and the Galicja rivers, stubbornly resisting the persistent attacks of the Austro-Germans to turn their flanks or pierce their center.

The Russian line extends in a great arc across the front of the Bug, it left resting upon the junction of the Lipa and the Dniester and its right extending across the Polish border north-west of Lemberg, joining the lines of the Russian army in Poland.

The Austro-Germans are attacking both tips of this line, attempting to roll them back, while a heavy attack is being pushed against the Russian center, east of Buzsk. Should success attend this drive against the center, the Russian line would be severed and Warsaw would be open to attack from the rear, practically undefended.

At the present time, the Russian organization is bending every effort to expedite the delivery of munitions along the Galician front and the generals in the field are being urged to hold out until the expected supplies can be brought up to the sorely harassed troops.

The Tenth Army made some progress against the Russian defense yesterday, shoving the Russians back along the Galician-Polish frontier and occupying the Polish town of Zawichost.

Berlin also asserted that between the Bug and the Vistula the Germanic assaults had gained ground.

## CITY OF MEXICO LEFT TO LOOTERS

Garrison Is Withdrawn To Augment Zapata's Defense Against Carranza Force

(Associated Press by Federal Wireless.)  
WASHINGTON, July 1.—Direct despatches to the State department from Mexico City carry word that the garrison has evacuated the capital in order to join forces with the 25,000 men under General Zapata, drawn up outside to defend it against the army of General Trevino, Carranza's new commander.

Vera Cruz, Carranza's capital, sends news that, immediately after the garrison withdrew, mobs began to pillage and loot the city, and that the situation there is desperate.

In the North, news despatches report that Villa's men have retaken the city of Laredo, and a consular despatch from the border to the state department announces that Villa yesterday removed Colonel Berboa, commanding the garrison at San Luis Potosi, because he threatened to levy forced loans on foreigners and to confiscate the gold and silver mines in the vicinity.

## STRIKE IN CHICAGO GROWS MORE SERIOUS

(Associated Press by Federal Wireless.)  
CHICAGO, July 1.—Sixteen thousand striking carpenters offered to return to work yesterday at their old wages, if the master builders would agree to use only Chicago materials.

The contractors rejected the offer. Inability to reach terms with the unions recently induced the builders to declare a lockout against all building trades workers, numbering some 200,000 men.

It now seems probable that 200,000 more workers, employed in the manufacture of allied materials, will strike.

HAWAII ALSO WILL BENEFIT  
(Associated Press by Federal Wireless.)  
WASHINGTON, June 30.—The department of agriculture will begin a new activity tomorrow when the "states relations service" opens. Dr. A. C. True is chief of the service, which will include experiment stations in Alaska, Hawaii, Porto Rico and Guam.

ARE YOU GOING ON A JOURNEY?  
Chamberlain's Colic, Cholera and Diarrhoea Remedy should be packed in your hand luggage when going on a journey. Change of water, diet, and temperature all tend to produce bowel trouble, and this medicine cannot be secured on board the train or steamship. It may save much suffering and inconvenience if you have it handy. For sale by all dealers. Benson, Smith & Co., Ltd., agents for Hawaii.

## FEDERAL DEFICIT IS \$75,000,000

Income Tax Revenue Balances Last Year's Shortage But Leaves Nothing In Treasury

(Associated Press by Federal Wireless.)  
WASHINGTON, July 1.—The federal deficit for the year ending last night will be, it is now estimated, in the neighborhood of seventy-five million dollars. The estimated total returns from the income tax will be eighty million dollars, thus balancing last year's deficit but leaving nothing in the treasury. The treasury deficit will be between forty and sixty millions and the postoffice department will run behind to the extent of between ten and fifteen millions, this loss being due to the shrinkage in foreign business because of the war.

It is not expected that any bond issue will have to be floated in order to keep the government going, although the deficit estimated as above does not include the disbursement on the Panama Canal, which will bring the actual total of expenditure over income up to very many more millions.

The trade balance in favor of the United States for the fiscal year is enormous, amounting to a billion dollars, a new record. By \$400,000,000. This tremendous excess of exports over imports is not due altogether to the great orders for munitions being filled in the United States, say the financial experts, but to a general increase in foreign trade with much of the world.

One of the most disappointing features of the fiscal year, in the eyes of the treasury department officials, is the great falling off of the emergency tax returns from the estimates.

## SERVICE OFFICERS AND RESIGNATIONS

Attorney General Wants Facts To Determine Whether Retirements Should Be Permitted

(Associated Press by Federal Wireless.)  
WASHINGTON, June 30.—Attorney General Gregory has asked Secretary of War Garrison for the facts in the case of Lieut. Col. Oduis C. Horney of the U. S. army, who has resigned as commander of the Picatinny Arsenal, Dover, New Jersey. Colonel Horney has resigned to take up a position with the Dupont Powder company, and the attorney-general has been asked by Secretary Garrison for an opinion on the right of official positions in times of peace.

Service To Country  
Secretary Garrison has pointed out that the development of private munition plants will materially strengthen the resources of the army and, that regarding the matter in this light the resignations of the officers might be construed as a service to their country.

Several army and navy officers are said to be considering resigning because of the attractive offers they have received from private concerns that are now handling large war orders.

Navy Officers Resigning  
The resignation of Maj. W. A. Phillips of the ordnance department, now at Sandy Hook proving rounds, is pending, and two naval constructors have presented their resignation. The naval constructors are resigning to take larger salaries as ship builders.

Secretary of the Navy Daniels will take no action pending the attorney-general's decision. Heretofore he has uniformly declined to accept resignations in such cases. He says, however, that it is not blind to the fact that in commercial life officers may assist the government.

## NAVAL WIRELESS SERVICE ON COAST IMPROVED

(Associated Press by Federal Wireless.)  
WASHINGTON, June 30.—Reorganization of the Pacific coast naval wireless service has been begun with the creation of a new position, that of superintendent of the naval radio system for the Pacific coast, and the appointment of Lieut. Comdr. E. H. Dodd to fill the position. He has been commanding the torpedo flotilla of the Pacific fleet. Commander Dodd is planning to reorganize the system so that Mare Island station will send and Yerba Buena Island station receive. Further south San Diego station will send and Point Loma station receive. Headquarters will be at Yerba Buena Island and repair headquarters at Mare Island.

## SIX INDICTMENTS HAVE BEEN FILED AGAINST BARTLETT

Late Brewery Manager Accused By Grand Jury of Embezzlement and Forgery

FUGITIVE FROM JUSTICE  
PROBABLY IS ON COAST

Speculation Rife Whether He Will Be Brought Back To Stand Trial

Four indictments for embezzlement and two for forgery were returned by the territorial grand jury yesterday morning against Charles G. Bartlett, late manager of the Honolulu Brewing and Malting Company, in a partial report filed by Foreman James H. Phillips in Judge Ashford's court. The indictments were ordered placed on the open file.

Asked what steps were being taken to bring Bartlett back to the Territory, Arthur G. Smith, deputy attorney general, said that he knew of none. He had not been consulted in the matter at all, he said. Bartlett left Honolulu for the mainland several weeks ago, before Judge Ashford's court. The indictments were ordered placed on the open file.

Two weeks ago Bartlett was in San Francisco, a prominent Honolulu said yesterday. He was allowed to make good as much as he could to the company of the large amounts he had pocketed, and this was allowed to leave the Territory before the authorities learned of the true state of affairs.

The indictment indicates charges that he appropriated to his own use from the funds of the company a total of \$5000, although Arthur M. Brown, deputy attorney general, said yesterday that Bartlett could be held on numerous other charges of a like nature. The grand jury charged Bartlett with having embezzled \$2500 on September 2, 1912; \$1000 on September 12, 1912; \$1000 on September 16, 1912, and \$1000 on September 30, 1912.

Forged Rollman's Name  
In the forgery charges it is claimed that Bartlett forged the name of Conrad Rollman, proprietor of the Royal Knives, in two documents, both of which were dated May 1, 1912. The documents were signed by Rollman's name, and the grand jury charged that Bartlett forged the name of Rollman for thirty-nine dollars seventy cents and forty-five dollars seventy cents respectively.

City Attorney Cathers and his assistant, A. M. Brown, said yesterday that Bartlett would be brought to Honolulu if he could be located. Unless Bartlett, if found, is willing to return voluntarily, extradition papers will have to be prepared, signed by Acting Governor Thayer or in California by Governor Phelan. The latter is not expected here until July 10, which means that he would not leave San Francisco before July 2. The papers would then have to go to Governor Johnson in Sacramento, provided Bartlett is found and held in California, or then to the Governor of whatever State Bartlett may then be honoring with his presence and temporary residence.

Asch Might Be Useful  
Deputy Sheriff Asch is in San Francisco, on a long seeking vacation, but it is believed that he would be willing to bring Bartlett back to face the charges. It might even chance that McGraith and McGraith might make the trip together, for there is belief here that McGraith has been located on the coast after making a short visit to the revolutionists in Mexico. In McGraith's case, no extradition papers would be required, for he could be brought back as a federal prisoner, a fugitive from justice.

"Is Mr. Bartlett in the Territory?" asked Judge Ashford yesterday, when the disposition of the half dozen indictments came up in court.

"No, your Honor," smilingly replied, Prosecutor Brown.

Court Thinks of McGraith Also  
"I might as well inquire if Mr. McGraith is still away and if Mr. John P. Mahy is in the Territory?"

No one could enlighten the court and the matter dropped.

No inquiry was made after Francis Hooge, but of course there are no charges pending against the late bank teller.

"Do you think that they will bring Bartlett back?" a member of the grand jury was asked yesterday, long after the indictments had been filed.

A shrug of the shoulder and an expressive, if not too elegant, manual sign was the answer.

## BRITISH CASUALTIES 113,439 IN THREE MONTHS

(Associated Press by Federal Wireless.)  
LONDON, July 1.—Total British casualties of all ranks, on the Continent and in the various operations against the Turk, for the last three months of the war, were officially given out here today as amounting to 113,439, of which number 6439 were officers killed and wounded. In April, the British lost in killed and incapacitated, 689 officers and 19,000 men; in May, 860 officers and 25,000 men; in June, 2209 officers and 69,000 men.

## JAPANESE WILL CONFER

(Special to the Hawaii Shipper)  
SAN FRANCISCO, June 30.—A great conference of the Japanese business men of the Pacific Coast will be held at the Panama-Pacific Exposition on July 29.

## TELEFUNKEN PLANT MAY BE TAKEN OVER

Wireless Station At Sayville Is Suspected of Directing German Subsea Raids

(Associated Press by Federal Wireless.)  
WASHINGTON, July 1.—The last link of direct communication between Germany and the rest of the world may snap now at any moment.

Well substantiated reports to the navy department that the Telefunken wireless station at Sayville, Long Island, has been guilty of sending out unneutral messages have brought the administration to a point where it is seriously considering taking the station over.

Since a British cruiser cut the cable between America and Germany in the first days of the war, the only direct messages to the United States sent out from Germany have been received at Sayville. Reports believe that, under favorable conditions, the station is sufficiently powerful to send across the Atlantic as well as to receive.

Naval officers have reason to credit reports that orders have been transmitted in code to German submarines operating around the British Isles.

## PASSPORTS NEEDED IN SOCIETY ISLANDS

(Associated Press by Federal Wireless.)  
WASHINGTON, June 30.—United States Consul Thomas B. Layton, of Tahiti, Society Islands, which are French possessions, has reported to Washington that all foreigners arriving in the French possessions in the South Seas without passports are being denied admission. Many recently arriving at Tahiti from San Francisco claimed to be Americans, but were suspected of being sent to the islands for espionage and the United Steamship Company will return them to California.

PASSPORTS BEFORE TICKETS  
(Associated Press by Federal Wireless.)  
SAN FRANCISCO, June 30.—The United Steamship Company's office here says that all purchasers of tickets to the Society Islands are required to show their passports since the French began demanding passports before allowing the travelers to enter the islands.

## BRITISH WORKMEN SPEED MUNITIONS

Campaign of Minister Lloyd-George Fills Factories Turning Out War Material

(Associated Press by Federal Wireless.)  
LONDON, July 1.—That there will be any need of compulsory action on the part of the government against the trade unionists and the other workmen in the munition factories to speed these manufacturing plants up to meet the demands of the army and navy is not now considered probable. The campaign carried on by Minister of Munitions Lloyd-George among the laborers and the backing he has received from the recognized union leaders has brought most gratifying results.

Last night the seven days were up, in which time Lloyd-George had given the workmen to decide whether they would temporarily abandon their labor union rules for the sake of the Empire or whether it would be necessary for the government to adopt some drastic step to compel the running of the munition factories on full time, and by last night the munitioned works were running to capacity.

Compulsion will not be necessary now, it is believed, to meet the demands of the war.

## ATTORNEYS FOR THAW REST SANITY INQUIRY

(Associated Press by Federal Wireless.)  
NEW YORK, July 1.—The attorneys for Harry K. Thaw, conducting his case in the retrial to determine his sanity, rested their case last night, after having presented numerous expert witnesses and others to testify to the rational state of Thaw's mind. The state put on as its first witness to prove the fact of Thaw's insanity the policeman who placed Thaw under arrest the night he shot and killed Stanford White.

A petition for its legal dissolution was filed by the Standard Hosiery Company in the office of the territorial treasurer yesterday. The petition was signed by O. St. John Gilbert, treasurer of the company.

## Federal Officers Investigate Case Of Annie Larsen

Working On Assumption That Rifles and Ammunition Were For Huerta Revolt

(Associated Press by Federal Wireless.)  
SEATTLE, July 1.—Searching investigation is being made into the circumstances surrounding the trip of the schooner Annie Larsen, which made the port of Hoquiam on Tuesday afternoon, in distress. The investigation is proceeding along two distinct lines, one by the customs officials and one by the officers representing the department of justice.

The customs officers are making inquiries to determine whether or not the schooner secured her clearance papers at San Diego under false pretenses, ostensibly clearing for Tampico, Mexico, while in reality intending to discharge her cargo at sea into the steamer ship Maverick.

Cargo For Huerta  
This cargo consisting of 4000 Springfield rifles and a million dum-dum bullet cartridges.

Her skipper, Schluter, declares that he does not know for whom his cargo of firearms and ammunition was intended, but states that he was under the impression that it was to be delivered ultimately to one of the Mexican commanders.

There is some speculation that the cargo was intended to be transferred to the Maverick for delivery to representatives of Huerta, in the new revolution he is believed to have planned.

Accounts For Maverick  
This would account for the mysterious sounding about of the Maverick, such as is reported, and for the plan to transfer the cargo at sea instead of carrying it direct to some Mexican port for discharge. The Maverick could stay at sea until ammunited to port, at such time as Huerta had been able to launch his revolution.

It is with some suggestion in mind that the department of justice is interesting itself in the matter, as the carrying of arms and munition in such a case would be a violation of the neutrality of the United States.

Penalty Is Confiscation  
The penalty for such an offense, if it be proven, would be the confiscation of the schooner and her cargo.

All the facts relating to the Annie Larsen are being communicated to Washington as fast as they can be secured.

## MORE STEAMSHIPS NEEDED FOR TRADE

Better Banking Facilities and 'Open Door' Also Necessary To Commerce With China

(Associated Press by Federal Wireless.)  
SAN FRANCISCO, July 1.—More steamships between the Pacific Coast and the Orient, better banking facilities and a continuance of the "open door" policy are necessary to promote closer business relations and added commerce between China and the United States.

These words, the honorary Chinese trade commission, which arrived here last night from Seattle, after a tour of the country, summed up the conclusions it has reached from many conferences with the leading business men, bankers and statesmen of the nation.

Ten of the party will sail for Hong Kong in the Siberia July 10, arriving at Hapag July 16. The remainder of the party will wait for the Manchuria, which sails from San Francisco July 20 and is due in Honolulu on August 7.

During their trip they visited twenty-seven American cities and inspected two hundred industrial plants.

## HAZERS MUST QUIT ACADEMY

(Associated Press by Federal Wireless.)  
WASHINGTON, June 30.—Secretary of the Navy Daniels and Admiral Fulam, superintendent of the Naval Academy, conferred today on the charges of hazing by the Annapolis men. Secretary Daniels says that "if anyone is found implicated in hazing he must get out of the academy."

## ITALIANS PRESS ONWARD

(Associated Press by Federal Wireless.)  
ROME, July 1.—Rigid censorship permits only meager news to trickle back from the Austrian front to the capital. The official bulletin yesterday reported that artillery duels continue in the Trentino and that the Italians on the Isonzo front are vigorously pressing their offensive.

## HAZERS MUST QUIT ACADEMY

(Associated Press by Federal Wireless.)  
WASHINGTON, June 30.—Secretary of the Navy Daniels and Admiral Fulam, superintendent of the Naval Academy, conferred today on the charges of hazing by the Annapolis men. Secretary Daniels says that "if anyone is found implicated in hazing he must get out of the academy."

## GERMANS KILL TWENTY MORE AMERICANS IN SUBSEAS RAID

Dominion Liner Armenian, Carrying Mules From Newport News To United Kingdom, Torpedoed By Submarine Off Cornish

STATUS OF VESSEL NOT YET FULLY DETERMINED

Steamship May Have Been Government Chartered Transport—Attack Serious If Against Peacefully Employed Trader

(Associated Press by Federal Wireless.)  
WASHINGTON, July 1.—Twenty more American citizens became victims to the war yesterday when the Dominion liner Armenian, bound from Newport News for a British port, was submerged off the Cornish coast and sunk. The steamer received no warning of attack and went down with nearly forty of her crew.

NEGROES AMONG LOST  
Among these were twenty Americans, twelve American negroes, who had shipped as muleteers, and eight white American seamen. A number of the crew were injured.

A report of the torpedoing of the Armenian was received in Washington yesterday afternoon, cabled by John S. Armstrong Jr., the American consul at Bristol.

The exact status of the Armenian is not known here as yet, but it is recognized that extremely grave consequences will result if the facts show that she was traveling as a regular merchantman.

MAY HAVE BEEN TRANSPORT  
On the other hand, if the steamer was under charter to the British government for the transportation of war supplies, she necessarily assumed the character of a war transport and the Americans in her crew were traveling at their own risk.

President Wilson was acquainted with the news last night at Cornish, New Hampshire, the summer capital. He will await the facts before taking any action.

ARTILLERY DUELS  
IN WESTERN ZONE

(Associated Press by Federal Wireless.)  
PARIS, July 1.—Artillery duels were in progress yesterday from one end of the western battle line to the other, with comparatively little infantry activity except around Bagatelle, where the night bulletin admits that the Germans, in a series of fierce infantry charges, gained a foothold. Big gun fire was hottest in Flanders, along the banks of the Yser canal, and on the front north of Verdun.

## HAZERS MUST QUIT ACADEMY
